

WORKSHOP 4

LOOPY PICTURES!

Today we will be making loopy pictures– literally!
We'll make collages and use loops to connect and finish off our drawings. There's an element of surprise too – as we will end up creating new kinds of creatures in the process!

WHAT YOU'LL NEED:

- images to cut up. Any used newspaper, leaflet, ad or flyer is good.
- scissors
- glue or a glue stick
- colours: felt tip pens or crayons, paint, watercolours
- paper

That's all!

Cut up the images. You can sometimes cut them right in the middle of a figure, too. Then glue the pieces randomly onto a sheet of paper.

Time to loop!

You can 'make' the image by connecting shapes, colours and lines with a black pen (or other colour if you wish).

Sometimes you can continue a pattern that you find,

or complete a shape with a loop.

Your drawing will grow into strange figures!

HOW MANY
CAN YOU MAKE? :)

you can also combine images
with each other directly

not bad!

sports pages are a good source for
images – with great expressions!

Why not use text as well? You can cut out letters or words, or just write your own.

Try different combinations!

Have a wee competition – which picture is the loopest!

Happy making!
