

WORKSHOP 5

LIGHT DELIGHT!

Today we will be using the light from your window to turn it into a 'LIGHT GALLERY.' What would you like to see in yours?

WHAT YOU'LL NEED:

- normal paper, thin paper works well.
- scissors
- transparent tape
- watercolours (you can also use felt tip pens)
- other translucent materials: wrappers, plastic, soda bottles etc.

That's it!

MAYBE you'll see a garden? Let's make it!

EASY PEASY! Watercolour lets light through nicely, but you can also use felt tip pens – or both! You just have to let the paint dry in between. :)

Experiment with colour, material, shapes... flowers, plants, animals... different transparent plastics, papers... the more materials you have, the more fun it will be to layer up your >

>> WINDOW GALLERY! >>>

Then just start building your garden! Tape the flowers, leaves, stems, and other shapes to the window, and design as you go!

You can explore and mix materials and colours

layer the shapes up

you can still paint or draw on them, too!

WHY not grow your
window gallery
into a
FULL GARDEN?

...add a plant every day!...

... MAYBE IT IS NOT A GARDEN
you would like to see,
but something else...?

this one turned into an aquarium... made of wrappings and 2 plastic bottles. :)

Twisted plastic of various colours makes great 'landscapes'!

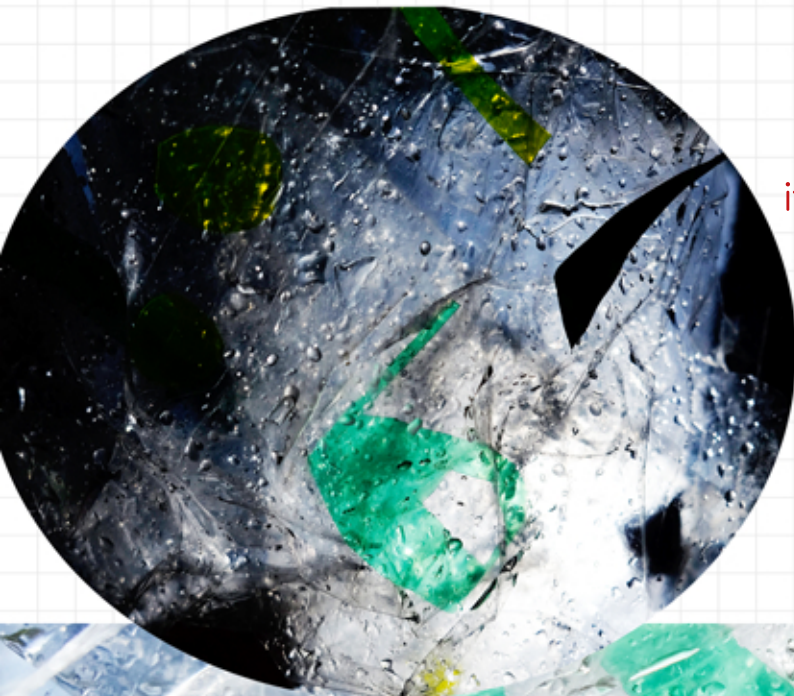

OR you
could go full

EXPERIMENTAL!

You can build up
various transparent
materials and just see
what happens!

...water droplets, wrappers, plastic
bottles – all are good!

if you
have a camera
or a mobile phone,
try taking close-ups
for interesting pictures!
What could you use them for...?

ENJOY EXPLORING!
