WORKSHOP 8

JEWELS!

Today we will make a diamond stash of our own just out of paper! Oh yes, and a bit of paint... Emeralds, rubys, space stones..? What would you like to make?

WHAT YOU'LL NEED:

PAINTS, CRAYONS, FELT TIP PENS

TAPE

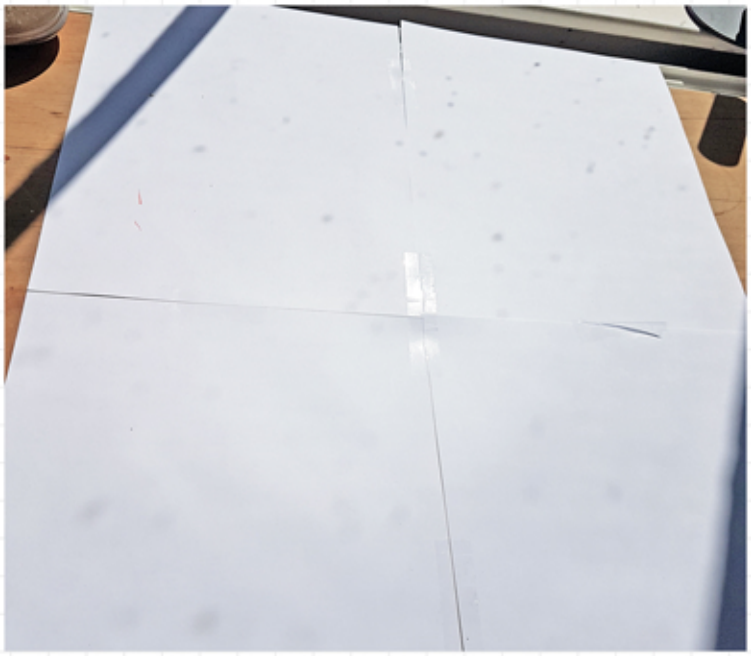

GLUE

SCISSORS

THAT'S ALL!

You want to work on a large piece of paper to put the jewels on. If you don't have one, you can just prepare one:

A strong or dark background colour makes the jewels really shine – but you can leave the paper white if you wish, it works as well. I wanted dark...

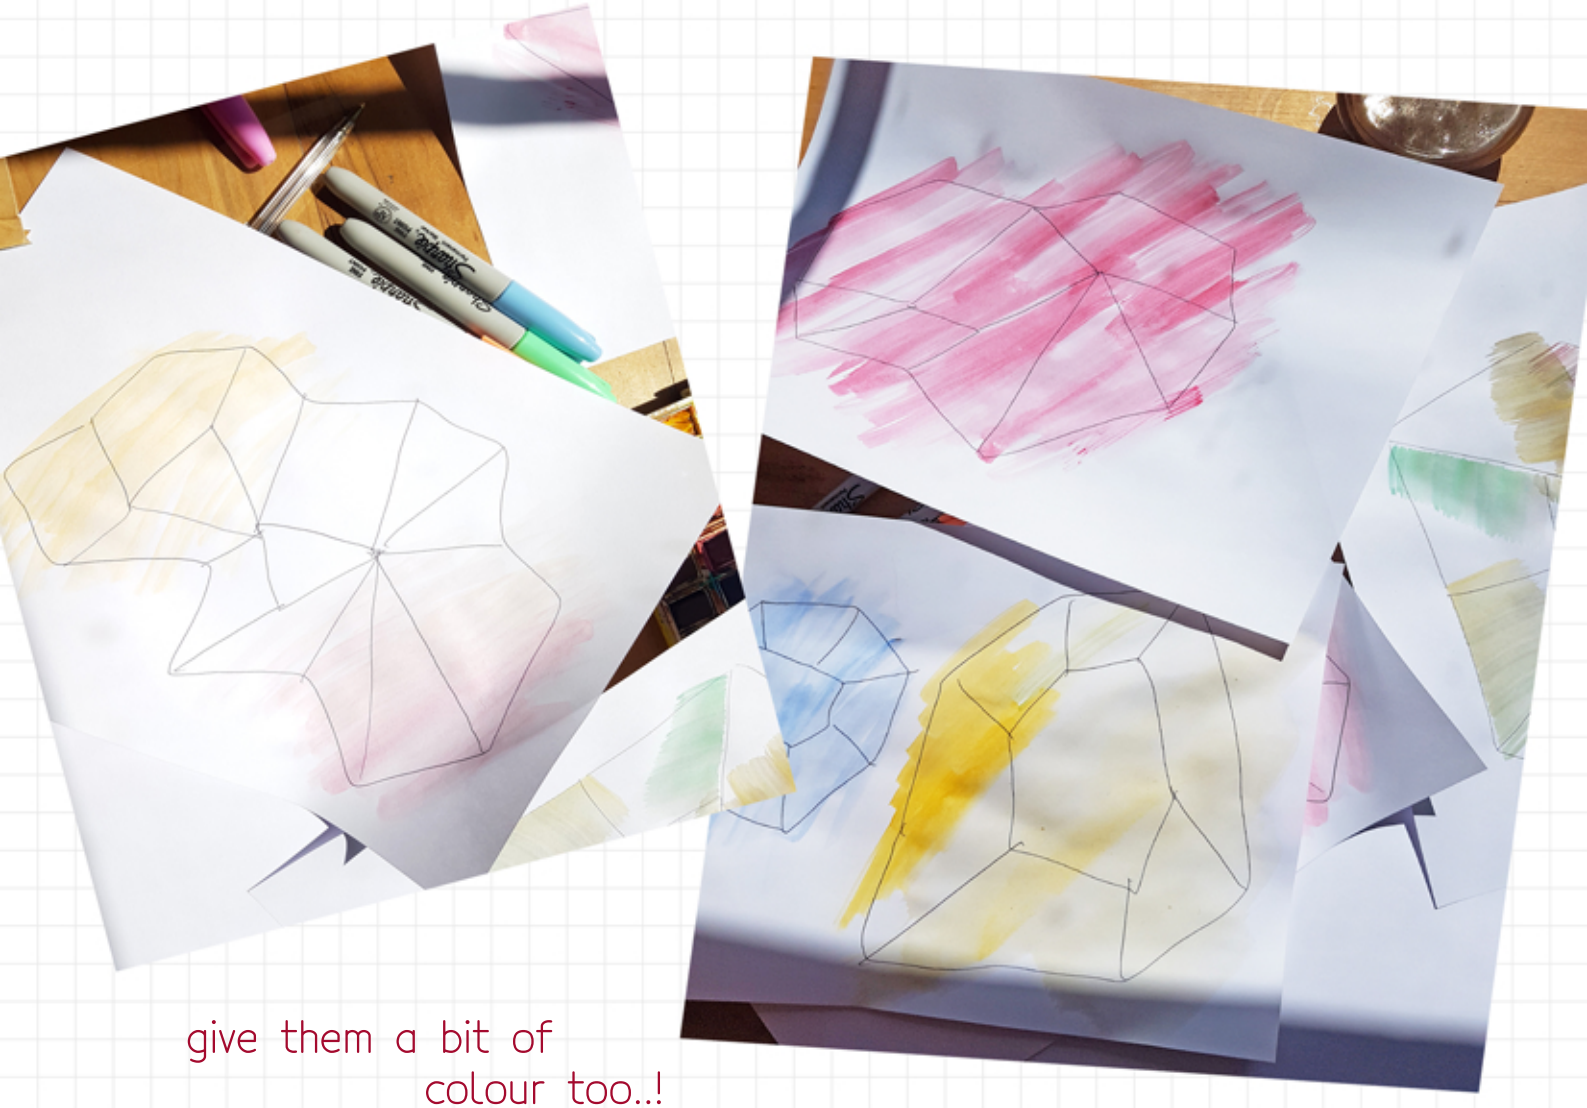

DONE!

Now, leave it to dry, and let's move on to.... >>

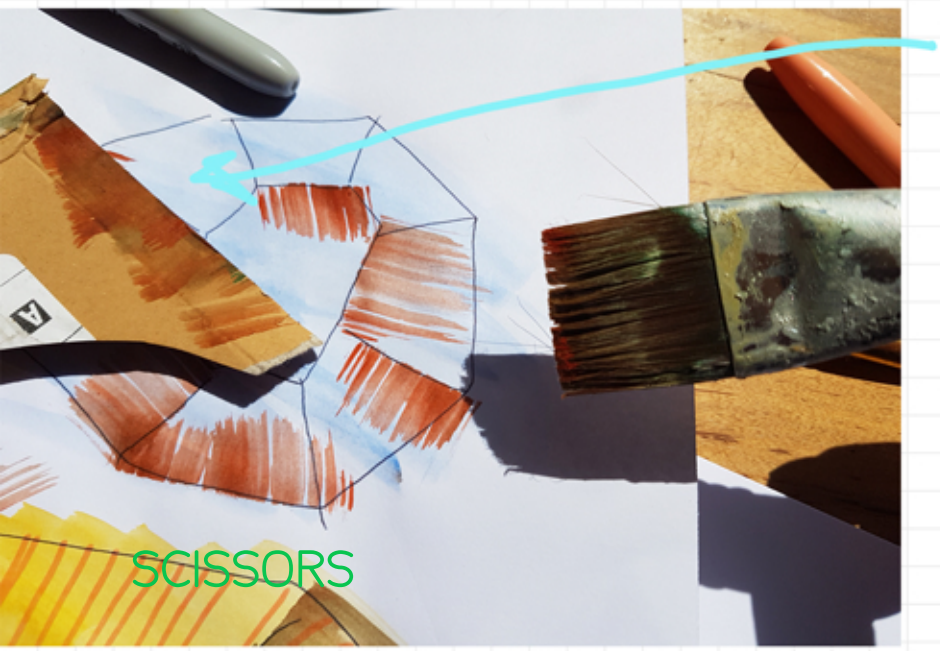

THE JEWELS...!!

you can tape the paper flat once it's dry

...start by drawing jumbled jagged shapes on the paper

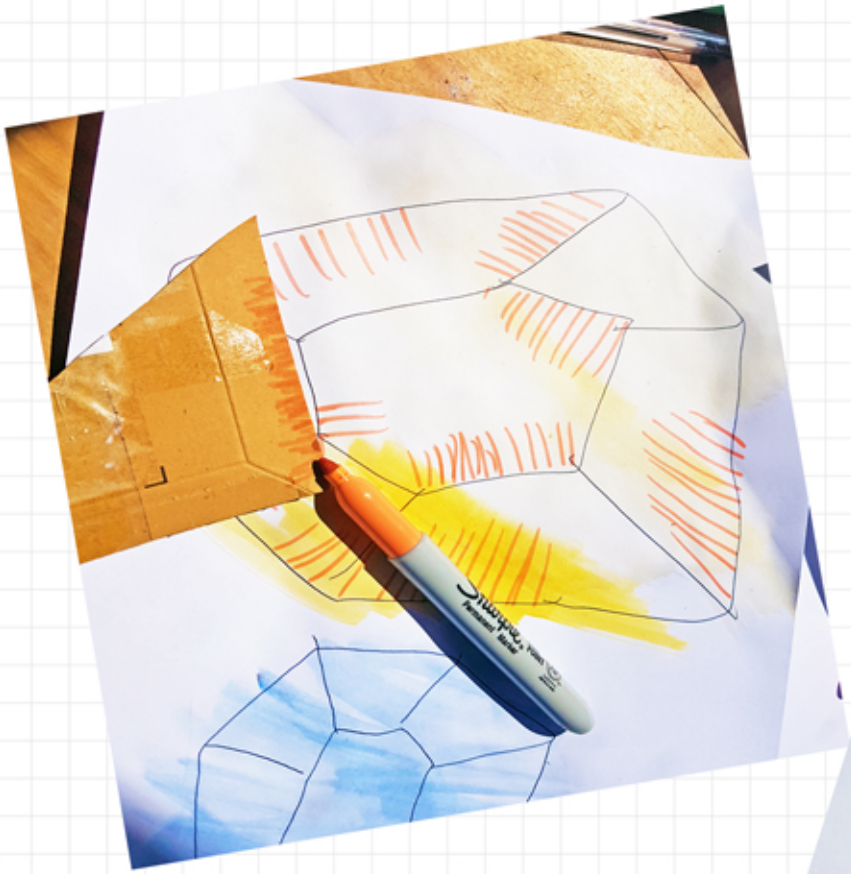

give them a bit of colour too..!

Next, use a piece of cardboard, ruler, or anything flat as a guide to make colourful brush strokes along the lines on your jagged shapes.

Again, you can make these pretty randomly.

LOOKING GOOD!

You can also use any colour pen or crayon to do the same – or you could do a mixture of the two!

PLAY WITH THE COLOUR>> !

then it's time to cut them all out

...

... layer them up on the backing paper...

...add some strips of paper for extra BLING...

..and it's ready – your brilliant new treasure!

See you next week!
