

Word Art Online Workshop

I've put together some ideas for you to create some cool word art!

All the ideas shown today have been done using pencils, pens and crayons (the more colours the better).

Did you know
that calligraphy
was the art
of fine handwriting?

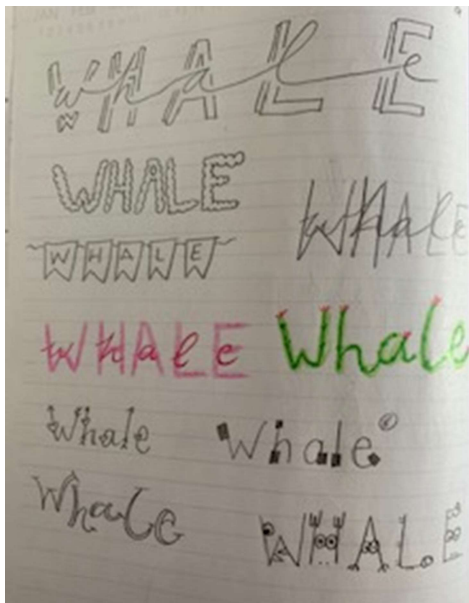

TOP TIP!

Try mixing your
writing instruments
to see what you
can come up with.

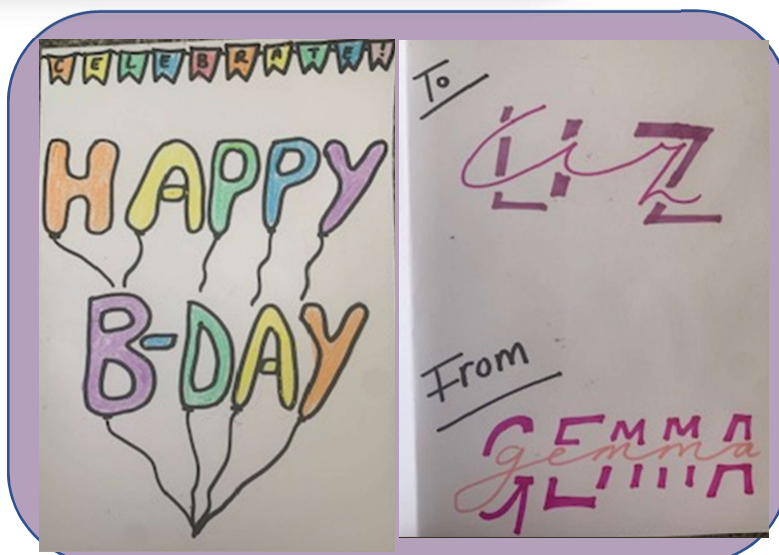

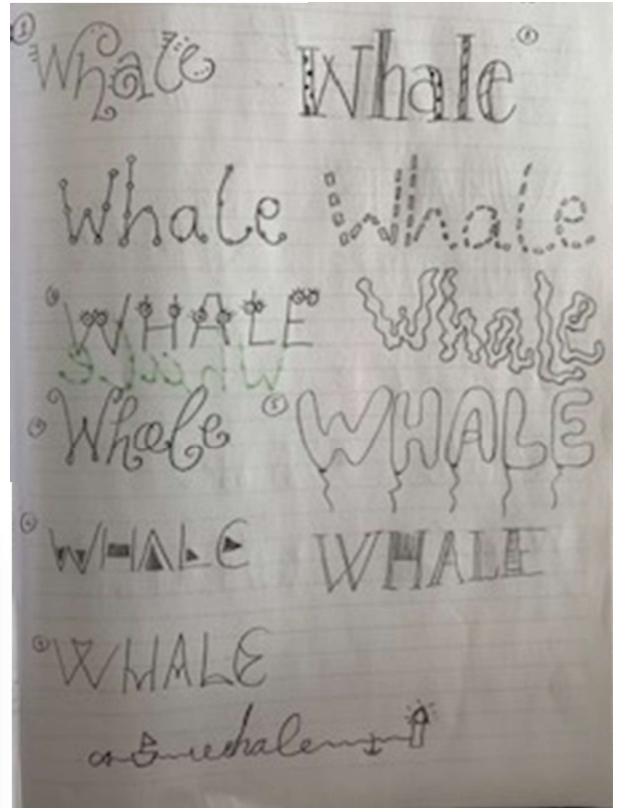

Want to know how to
make something like this..?

Here are some other word art ideas for you to try!

I chose the word WHALE to begin with, and then practiced using some different words!

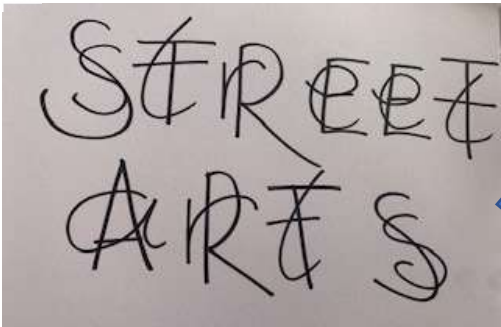

TRY IT AT HOME!

Make someone a card to let them know you're thinking of them. You could take a picture and send it to them.

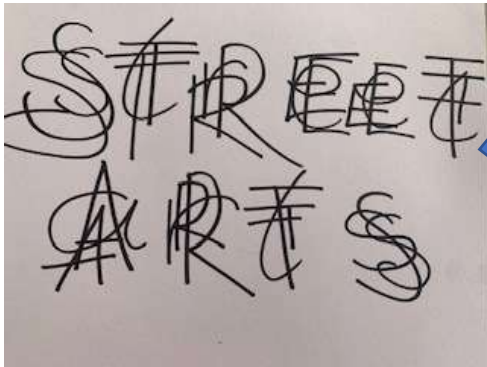

1. Start by writing your words in capital letters (I've chosen STREET ARTS)

2. Then, write over this using lower case letters – don't overthink this step just let your pen/pencil flow.

3. Go over your writing as many different times as you like (I find 3 is best) until you are happy.

4. Then grab your colours and get creative! Colour in the spaces your pen has made, (for this one I used pens and crayon).

END RESULT

Try writing you and your friends' names using this style!
