

DEEP SEA COLLAGE #1

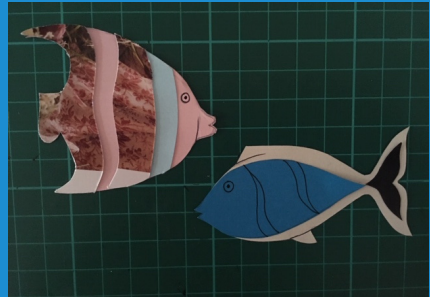

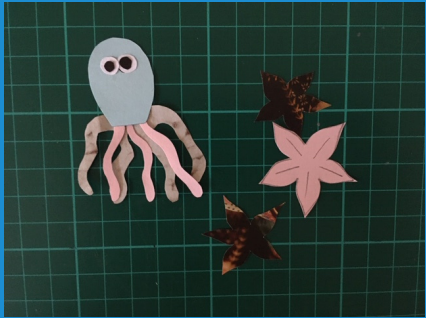

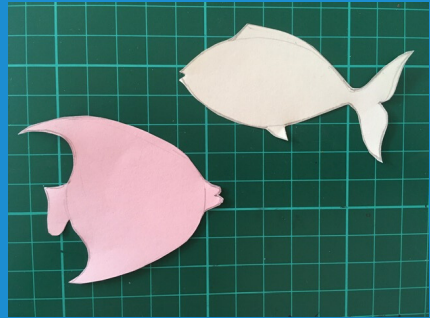

WHAT YOU WILL NEED:

Coloured paper

Glue

Scissors

Pens or pencils

Draw, colour in and collage sea creatures and ocean plants using coloured paper, pens or pencils. Cut them out!

You can also draw onto and cut out shapes from magazines and newspapers if you have any at home. This will give your collage different textures and colours. But don't forget to ask your adult first!

Rip up some dark blue paper and place at the bottom of your light blue background to give the impression of the seabed

Glue the sea creatures and plants onto your background! Don't forget the air bubbles!

DEEP SEA COLLAGE #2

WHAT YOU WILL NEED:

Plastic wallet

Scissors

Paint

Your sea creatures and plants

Glue

Cut along 2 sides of a plastic wallet so that it can open up like a book

Using a lot of water, paint the inside of the plastic wallet then close it back over and wait for it to dry

When dry, open the wallet up and glue your sea creatures and ocean plants on to one side

Close the wallet and tape or glue the back

Hang or tape to your window for the full underwater effect and watch how the weather changes your collage!
