

Toilet Tube Sea Creatures

How many of these do you have in your house??

LET'S TURN THEM INTO FUN SEA CREATURES!!

Start by wrapping your toilet roll in coloured paper (any colour looks **GREAT!**)

Then, using the scraps, cut out some pincers and legs.

Using **another** colour, cut out some spots and some rectangles (we will use these later).

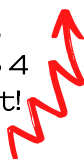

Notice the frill detail in the orange rectangles? These are made by cutting small strips from the bottom to **ALMOST** the top of the paper.

Glue the details down until you are happy with the results.
Now we will move onto some bendy legs!

Make some bendy legs by folding the paper into 4 parts then opening it out!

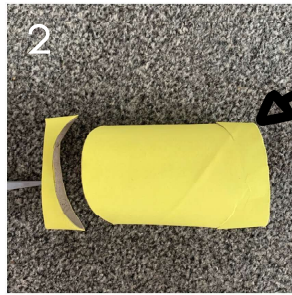

Add the final parts using some glue, googly eyes and a smiley.

AND VOILA! Your very own toilet tube lobster!

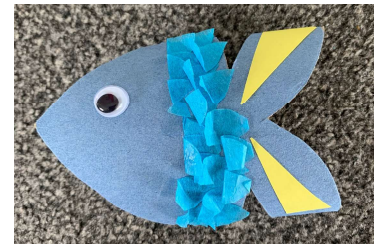

Why not try making a cool fish family using some scraps and pens to design them?

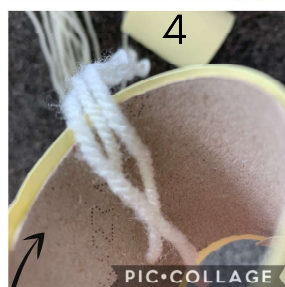

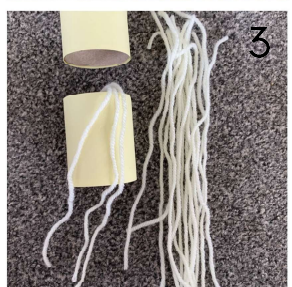

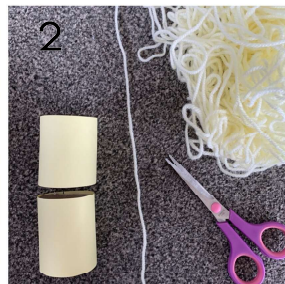

Notice the small slits I used to make some gills

You can decorate yours however you like!

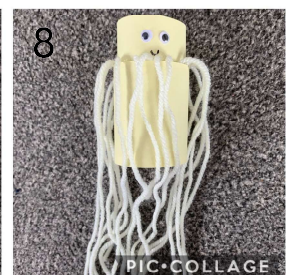

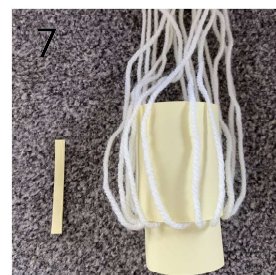

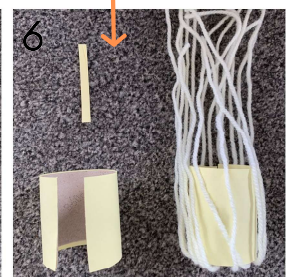

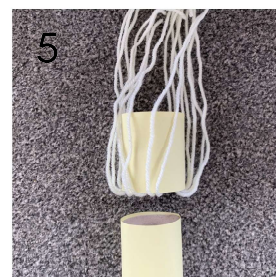

Toilet Tube Wool Jellyfish

For this bit, make sure you use some glue to secure the wool on the inside!

Once you've removed a small slice of the tube, secure it back together with some glue (leaving the scrap piece out)!

It also moves up and down!
